Purchase Kigo Movie One for Windows

To buy a license key for Kigo Movie One for Windows, click Here.

1. Why should I buy Kigo Movie One for Windows?

The trial version of Kigo Movie One only enables the users to download the first 5 minutes of each video. You will receive a registration email and code after making the purchase and save the full videos onto your computer without limitations.

2. What benefits do I have after registration?

- Unlimited use during the subscription period without any function restrictions.

- FREE upgrades to the latest versions of the same product.
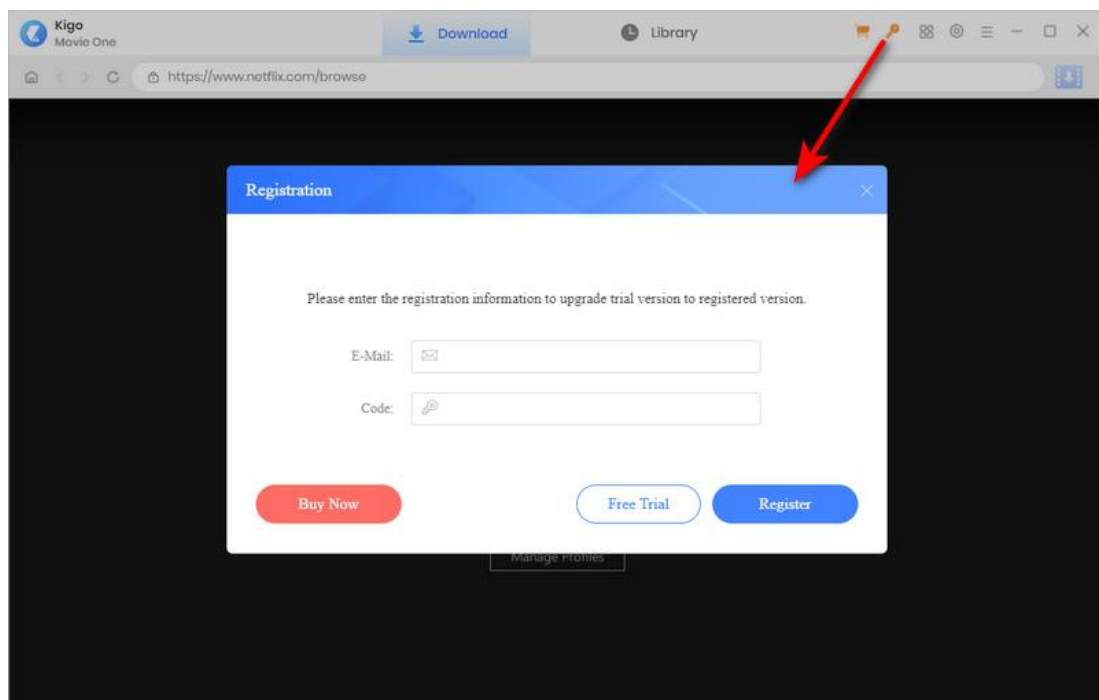

- FREE technical support.

Register Kigo Movie One for Windows

Step 1: Run Kigo Movie One on your Windows PC, click the **"Menu"** button at the upper right corner of the interface, and choose **"Register"** in the drop-down menu. Or you can directly click on the key icon to open the registration window.

Step 2: Copy and paste the registration email and code you received into the registration popup window, then click the **"Register"** button.

After the registration process, the limitations of the trial version will be removed.

Tips:

1. Make sure your computer is well-connected with the Internet.

2. We suggest you should just copy & paste the registration information into the popup dialog.

3. Make sure both the registration email and registration key are provided by our company after purchasing. If you have not paid, please click **"Buy Now"** to get a license.

4. Please make sure the registration email and registration key you entered are both complete and correct, otherwise an error message will pop up as below:

# Installation & Interface

- Installation
- Main Interface
- Menu

Installation

To install Kigo Movie One, please refer to the following steps:

1. Download the latest version of Kigo Movie One through the Download Center.

2. Double-click the installer and then the software installation screen will pop up. Follow the instructions to complete the installation of the product.

3. After installing, you can double-click the program icon to launch the program.
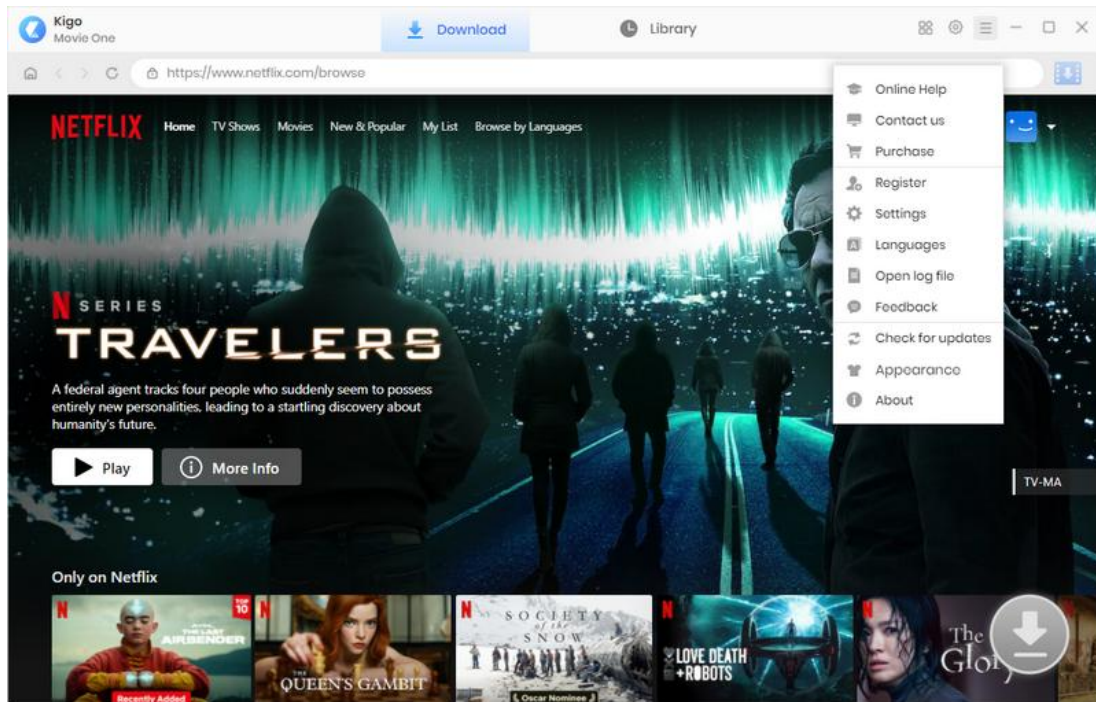

Main Interface

Launch Kigo Movie One for Windows, you'll see the main interface as the image below.

Menu

Click the **"Menu"** button on the upper right corner of the main interface, and the drop-down list will appear. Here you can choose to register the program, change the output settings, check for updates when a new version is available, ask for online help when you have any problem or suggestion with the program, etc.
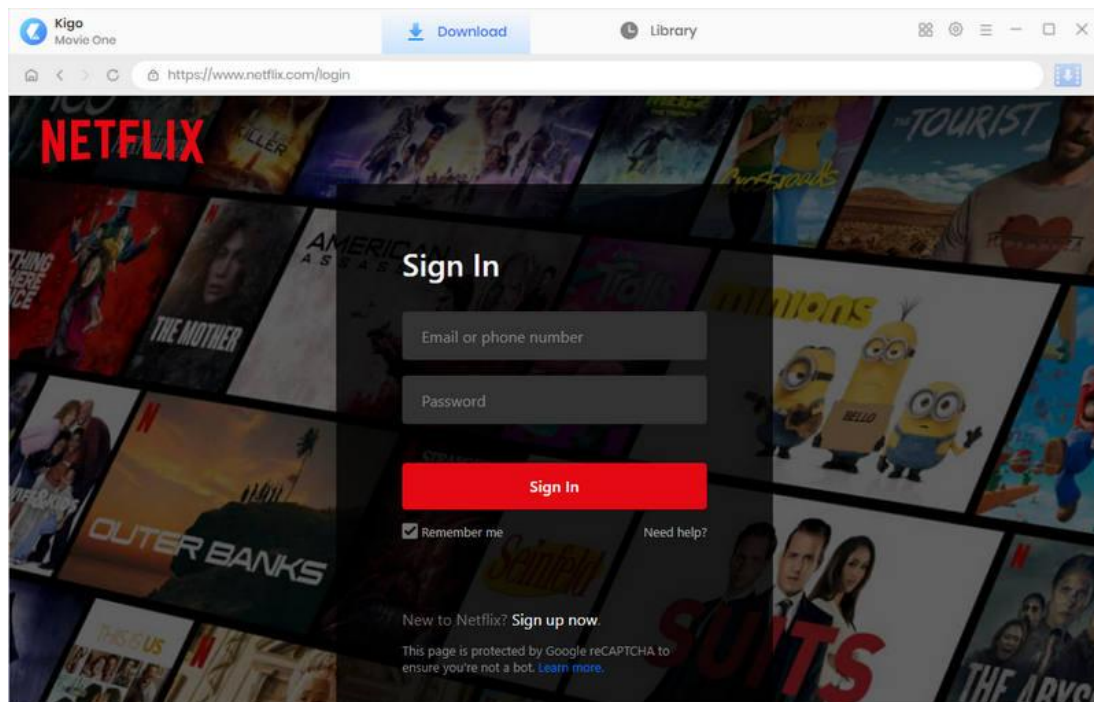

Tutorials

Select a Video Website

Run Kigo Movie One on your Windows PC. Choose a video site from which you wish to download videos. Kigo will automatically open the web player. You are then required to log into your account in the built-in web player. Simply follow the tips.
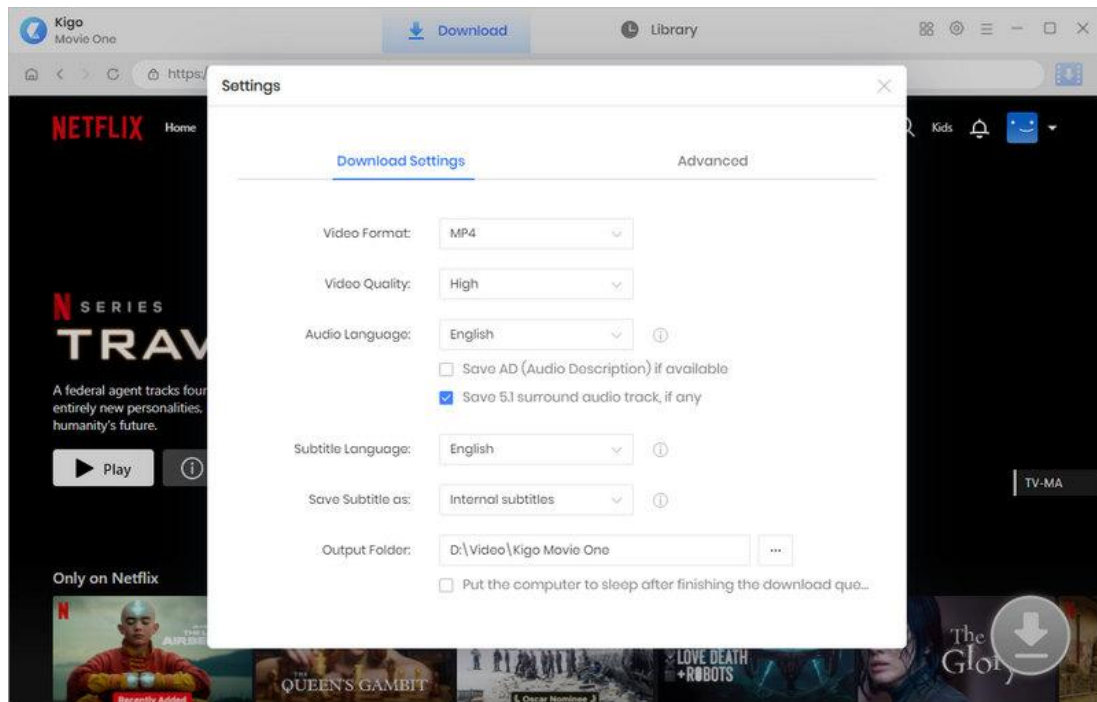

Please note that you only need to log in to your account when downloading videos from streaming service. If you are downloading from social media platforms, please ignore this step.
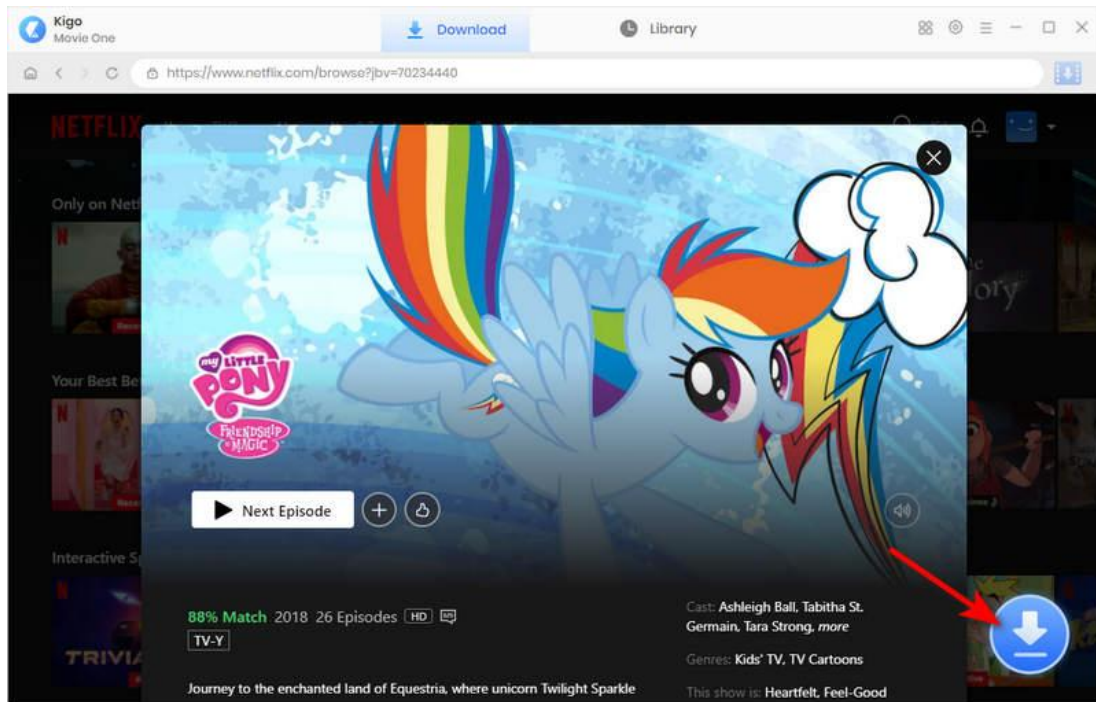

Customize Output Settings

You can set up the output settings of the video by clicking the **"Settings"** button in the upper right corner. You can choose the video format (MP4 or MKV), video quality (Low, Medium, and High), the language of the audio track and subtitle, the output path, and more.

Search for Desired Video

Search for your wanted video by browsing the web player or using the search feature of the platform. Alternatively, enter the video name or link into Kigo's search bar. Open the video and click on the arrow icon named **"Click to download this title"** to let Kigo load the related video on a popup.
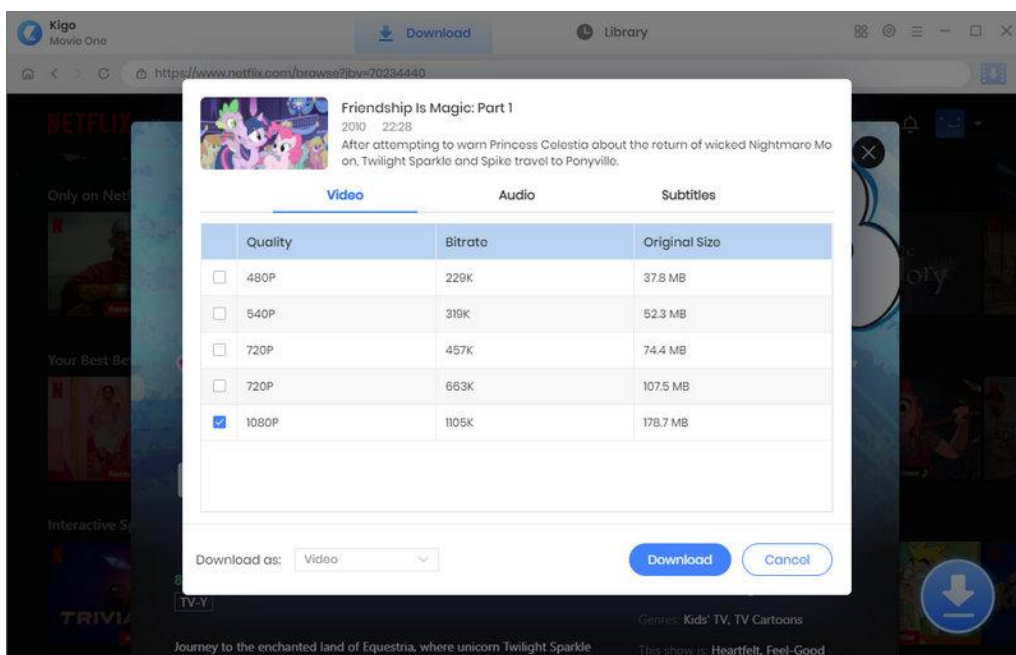

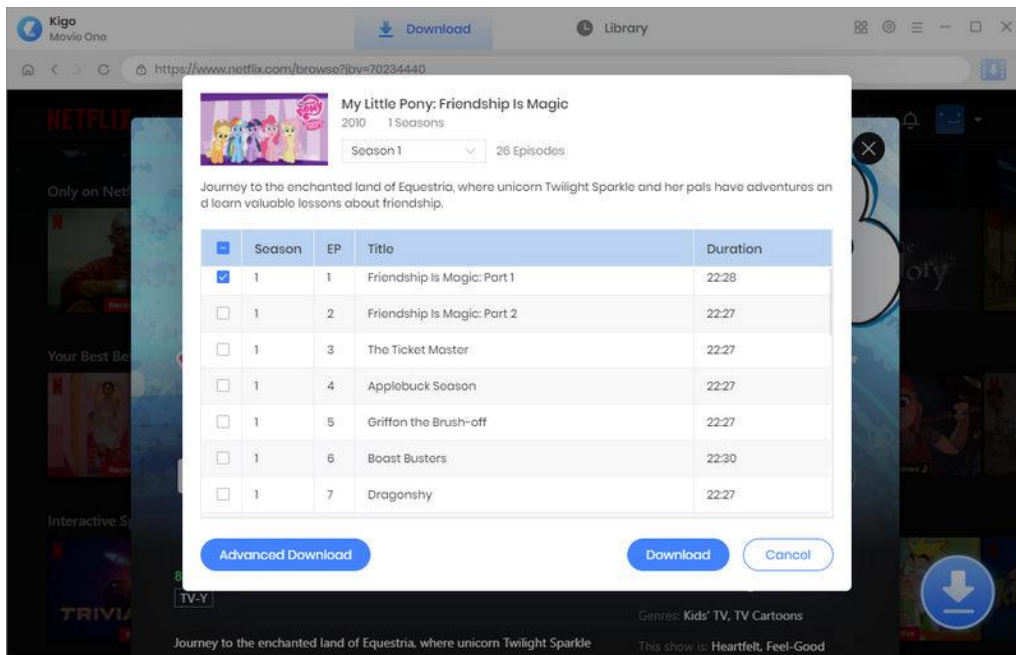

Choose Advanced Download Settings

Kigo offers advanced download options to let you choose specific parameter for the video. You can pick your preferred video quality, as well as audio track and subtitle. It is also worth noting that this feature is also only available for downloading videos from streaming media.

In addition, if you are downloading a TV show, you need to select a season and wanted episode first, and then click on the **"Advanced Download"** button to access the advanced download options.
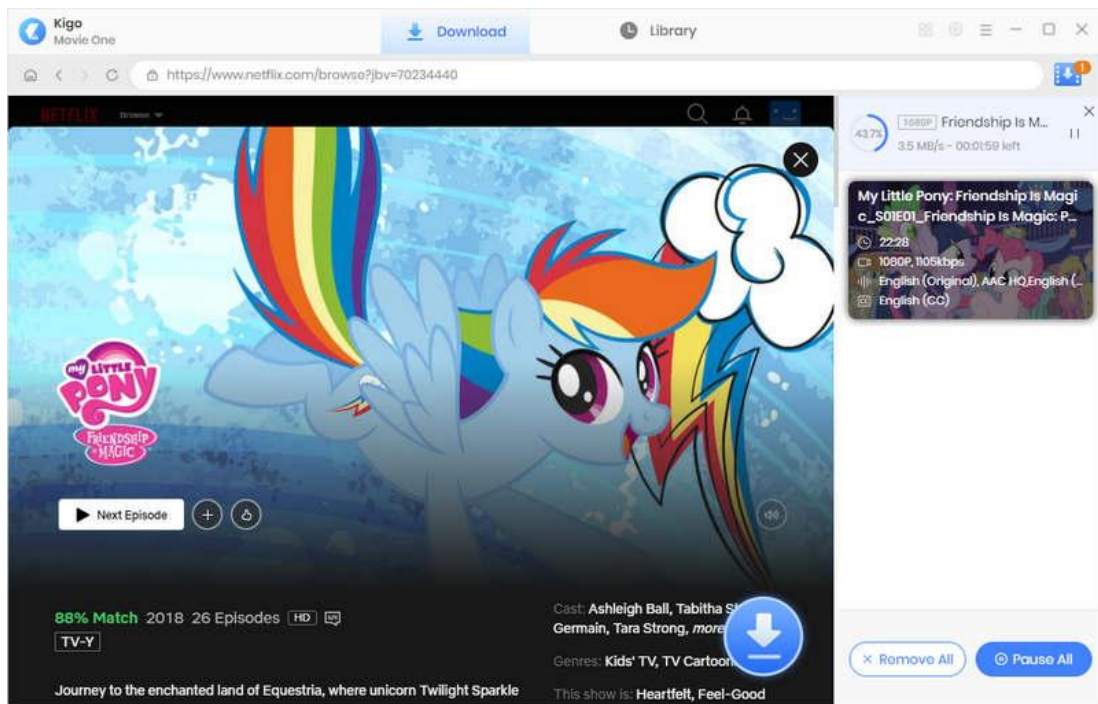

Download Selected Video

Next, you can download the video by clicking the **"Download"** button. A window will pop up on the right side of the software where you can see the downloading video as well as the internet speed and download progress.
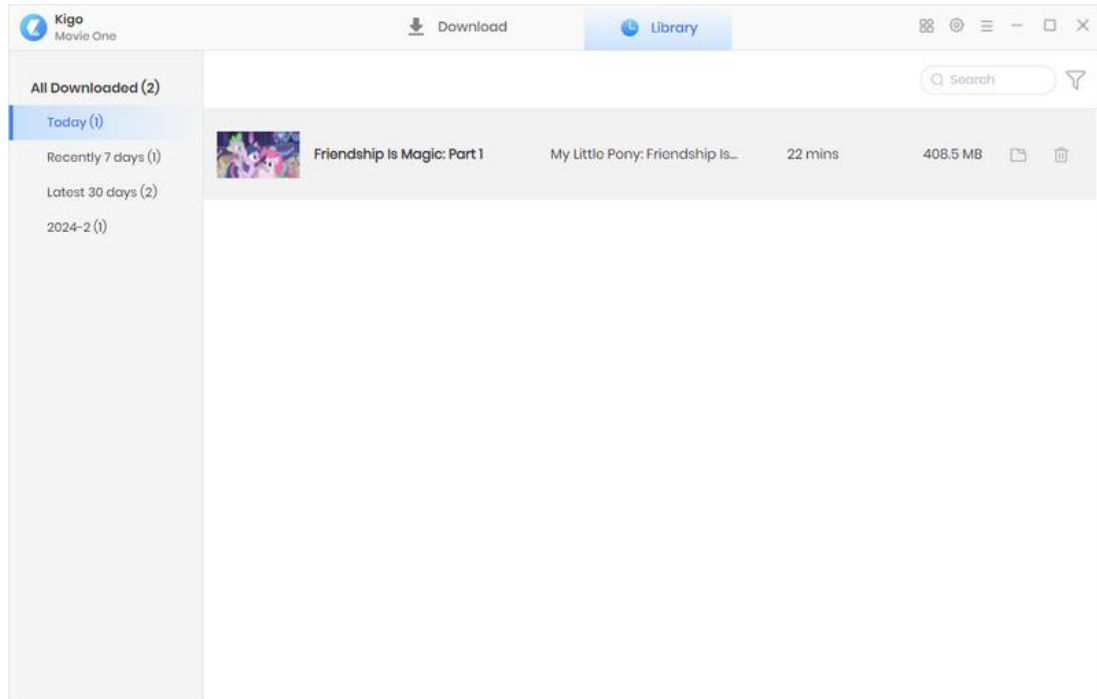

If you want to download more videos, add them to this task list by repeating the previous process. Kigo will automatically start a new download once the current task is finished.

Check Download History

When the download is finished, click **"Library"** and you can find the downloaded video and the history of downloading. To open output folder, you can click on the file icon.
